## Summary

---

I have 12+ years of software engineering experience across various platforms and parts of the tech stack. Past experiences include launching a highly performant cryptographic transport library, migrating existing micro-service backend to Kubernetes, and creating Android app solutions. Expert in network engineering, backend development and scalable infrastructure. Passionate about security.

## Work Experience

---

### AWS

Seattle, WA

Software Engineer – Cryptography - Transport libraries

Feb. 2021 - Present

- Core maintainer of cryptographically secure transport libraries which power the majority of internet traffic within AWS datacenters.
- Open-sourced and maintained [s2n-quic](#), a production ready implementation of the [QUIC](#) transport protocol; which is the backbone of HTTP/3.
- Core maintainer of the [s2n-tls](#) C codebase and Rust bindings, a TLS protocol library which is the key AWS services.
- Migrated CloudFront to s2n-quic for HTTP/3 support. Enabled multi-certificate support for CloudFront subdomains by adding support for [asynchronous certificate loading](#).
- Secured team consensus and implemented large-scale library features, which influenced public APIs; highlights include: [Ack-frequency](#) analysis, implementing a zero-cost [event framework](#), QUIC Connection Migration support, adding [client support](#) to s2n-quic, [mitigating Optimistic Ack Attack](#), [pedantic memory checks with Valgrind](#), [OpenSSL 3.0 support](#).
- Created [Netbench Orchestrator](#), which enabled production-like testing of network protocols on EC2 hosts, and informed data-driven decisions in library development.

Software Engineer – EC2

Nov. 2019 - Feb. 2021

- Maintained a core service which repaired 100K+ live customer EC2 hosts/month without impacting production workload.
- Implemented and automated a granular fail-safe switch which prevented customer impact, increased availability of our service and built cross-team trust.
- Replace hardcoded EC2-compatibility rules across multiple services with a service-based approach which increased auditability and feature agility.

### iHeartRadio

New York, NY

Infrastructure/Backend Software Engineer

Feb. 2017 - Mar. 2019

- Led the launch of Music Recommendation service, aligning stakeholders across Data Science/iOS/Design teams. Responsibilities included designing APIs, architecting a resilient storage with rollback capabilities and implementing service logic.
- Migrated Scala micro-service backend from Akka Cluster to Kubernetes over 6+ months.
- Worked as part of small team to launch a highly-available Kubernetes deployment/rollback process for the Backend services team (deployed on AWS using [kops](#)); collaborated with SRE team to set up additional Kubernetes clusters and standardize the process for all teams across the company, while balancing cost, reliability, and maintenance overhead.
- Mitigated outage risks during MongoDB upgrades and mutations by implementing [embed MongoDB](#) testing for all services.

### Consulting

Remote

Independent Consultant

Mar. 2016 - Feb. 2017

- Worked closely with [Shatterproof](#) non-profit leadership team as technical advisor; translated business requirements into technical-specification documents, interviewed candidates, and helped assess software systems proposed by outside contractors
- Delivered project management app for a construction firm, featuring Google Drive-backed storage, distributed synchronization across multiple devices, text/PDF/image editing, and full offline support.

### TouchLab

New York, NY

Android Engineer

Sept. 2014 - Jan. 2016

- Delivered a solution to assist Forest rangers with deforestation reporting; featuring offline support, custom map rendering, and 3<sup>rd</sup> party data collection. Supplemental information: [meetup presentation slides](#) and [project mission](#).
- Collaborated closely with customers to deliver Android based solutions in a quick-paced environment.

## Education

---

### The Cooper Union for the Advancement of Science and Art

New York, NY

Bachelor of Engineering | Full-tuition Academic Scholarship

Graduation 2012
